

Curriculum Vitae

DARBOUX Bruno

CURRENT POSITION

Name of company

Airbus

Job position

Vice-President Systems Strategy and Programs

PROFESSIONAL BACKGROUND

Since 2015, Bruno Darboux steers Airbus Research and Technology effort for aircraft systems, and leads the development activities for new system capabilities.

He is responsible for defining the aircraft system offers that maximize the safety of Air Transport operations and the efficiency of Airlines business.

As part of this mission, he acts proactively towards the transformation of Air Traffic Management worldwide.

As a separate role, Bruno Darboux is also Airbus Engineering Senior Site Representative for France.

Regarding his professional background, since his graduation in 1985 and military service in the Air Force, Bruno Darboux worked for Thales, ATR and Airbus.

He was involved in numerous developments of civil and military platforms, in Engineering and Program roles.

Between 2003 and 2009, he led the development of the Cockpit and Avionics Systems for the A400M Military transport, from Programme launch to First Flight.

Between 2010 and 2014, he led the definition of Airbus process, methods and tools for systems development and managed the teams that perform the safety, human factor and environmental compatibility demonstrations for Airbus aircraft.

EDUCATION AND TRAININGS:

Bruno Darboux holds an Engineering Degree from ENSAE "Sup'Aero", the French Aerospace Engineering Institute.

EXTRAS:
