

# Curriculum Vitae

## BOUCHER Alain

### CURRENT POSITION

---

**Name of company**

Dassault-Aviation

**Job position**

Senior Technical Manager, Navigation & Flight Guidance Systems

### PROFESSIONAL BACKGROUND

---

Alain Boucher has been working with French aircraft manufacturer Dassault Aviation for more than 30 years.

He obtained his engineering diploma in 1987, and has acquired since the 90's a significant experience in the field of Digital Flight Control systems and Avionics systems for military and civil aircraft.

He has been responsible in the past for the design and development of the Navigation and Flight Guidance systems for several Dassault military aircraft programs, and more recently for the Falcon 7X / 8X / 6X business jets. He is today the head of the department in charge of designing Navigation, Surveillance, and Flight Guidance Systems for all Dassault aircraft, civil/military and manned/unmanned.

As a Senior Technical Expert, he is since 2014 also in charge of establishing and driving Dassault Aviation technical roadmap regarding ATM. He reports directly to the Engineering Executive Vice-president.

### EDUCATION AND TRAININGS:

---

Alain Boucher holds an Engineering degree from ISAE-ENSMA, "Ecole Nationale Supérieure de Mécanique et d'Aérotechnique", a school of the French aerospace engineering institute.

### EXTRAS:

---
