

Curriculum Vitae

Hermann MATTANOVICH

CURRENT POSITION

Name of company

Frequentis AG

Job position

Chief Technical Officer

Member of the Executive Board, Frequentis AG

PROFESSIONAL BACKGROUND

Mr Mattanovich began his professional career as a technical consultant for companies like Philips, Elin, VOEST and Frequentis. He also worked as a lecturer at his alma mater.

In 1988, he was cofounder of PDTS, a software development company based in Vienna. As its managing director, he was (and still is) responsible for the successful development of the business: the company currently employs around 90 engineers. An ongoing and successful collaboration between Frequentis and PDTS dates back to the latter's early days, and led directly to Frequentis taking over 100% of the company. PDTS contributes significantly to the success of product and system development projects.

Between 1999 and 2004, Mr Mattanovich was also responsible for the TETRA development portfolio at Frequentis. In 2005, the company's TETRA activities were spun off into a separate specialist company as whose CEO, Mr Mattanovich, gained additional expertise in radio solutions for the private mobile radio market (the company was taken over by SEPURA Ltd. in May 2012.)

In January 2009, Hermann Mattanovich was appointed to the Frequentis executive board and entrusted with a technology remit. His responsibility covers Research & Development and Engineering. Additionally, he brings in his expertise in large Frequentis projects where there is high request for technologically innovative solutions.

A special focus was, and is, the board guidance he brings in complex defence projects like the long-term FLORAKO programme in Switzerland (delivery of an IP voice communication system for the Swiss air Force), the UCMP Programme for the Royal Air Force in Great Britain or the ongoing One SKY programme in Australia which deals with the delivery of the first fully integrated air traffic management system, used for both civil and military air traffic control, for the entire Australian continent.

"My objective is to further reinforce two of the key strengths of Frequentis: technical competence and innovation" says Mr Mattanovich, commenting on his field of responsibility. His vast technological knowledge and experience, together with a long history in product development and project implementation, form the basis for achieving this goal.

EDUCATION AND TRAININGS:

Mr Mattanovich is born in Klagenfurt, Austria, on March 4th, 1960 and graduated from the Vienna University of Technology in 1985 with a degree in electrical engineering.
