1. INTRODUCTION

1.1 The SESAR Programme

The SESAR (Single European Sky ATM Research) Programme has been launched as a critical part of the Single European Sky initiative (SES). This programme represents the technological pillar of the SES and aims at developing a modernised and high-performance air traffic control infrastructure which will enable the safe and environmentally friendly development of air transport.

The SESAR Programme is composed of three phases:

- Definition phase (2004-2008), which delivered an ATM Master Plan for 2020 and beyond, defining the content of the next generation of ATM systems, and identifying the necessary elements for its realisation. The Definition Phase resulted in 6 main Deliverables;
- Development phase (2008-2013), which will develop the necessary elements on the basis of the Definition phase findings;
- Deployment phase (2014-2020), through which there will be large scale production and implementation of the new air traffic management infrastructure, composed of fully harmonised and interoperable components which guarantee high performance air transport activities in Europe.

1.2 The SESAR Joint undertaking

In order to properly manage the development phase of this huge and ambitious project, a legal entity was created, under European Community law, on 27th of February 2007: the SESAR Joint Undertaking (SJU).

- organising and coordinating the development activities of the SESAR project, in accordance with the ATM Master Plan by combining and managing under a single structure public and private sector funding;
- ensuring the necessary funding for the development activities of the SESAR project in accordance with the ATM Master Plan;
- ensuring the involvement of the stakeholders of the ATM sector in Europe, in particular: air navigation service providers; airspace users; professional staff associations; airports; and manufacturing industry; as well as the relevant scientific institutions or the relevant scientific community;
- organising the technical work of research and development, validation and study, to be carried out under its authority avoiding fragmentation of such activities;
